TELESCOPIC & SECTIONAL MAST SYSTEMS

Proven design, quality manufacture, in-service reliability = Total Satisfaction

TYPE PU

Used extensively in military applications, since the 1970's PU telescopic masts are tried & tested with thousands already in service.

Standard heights are 5/8/10/12 metres and can support headloads up to 10 kgs.

No additional power source is required.

Accessories available for vehicle/shelter mounting.

TYPE SPUR

These masts have the added advantage of being rotatable and height adjustable for LOS applications.

Both masts are lightweight, carried by one man.

TYPE SCAM

SCAM 7, 9, 12, 15 & 21 metre air operated telescopic masts provide a strong, reliable lifting device for directional / non-directional antennas weighing up to 70 kgs (SCAM 7). These masts can be hard surface deployed or erected semi-permanently with guy ropes.

SCAM masts can be extended by manual handpump, 12, 24, 110, 230 or 415 volt compressors. Or alternatively utilising the vehicle air braking system.

SCAM 21

SCAM 9

ALL CLARK MILITARY MASTS CAN BE : FIELD MOUNTED, VEHICLE MOUNTED OR SHELTER MOUNTED

All Clark Masts feature : - High quality materials
- Military finishes
- Spare parts supply guaranteed for 20 years

TYPE 73 & SERIES 90

Type 73 and Series 90 are both tubular mast systems, both extended by a mechanical hoist and can be extended to any height with complete safety. These systems feature a mechanical guy controller which tensions the guys as the mast extends enabling the mast to be erected in high winds.

HEADLOADS :

TYPE 73 :
50 to 75 kgs.

SERIES 90 :
100 to 300 kgs.

SCAM 12 - Container mounted

MOUNTINGS & ACCESSORIES

Clark Masts military range are normally supplied in field kit form to a standard specification.

A wide range of accessories for shelter, vehicle and specialist mounting are available.

Please ask for further details !

SCAM 21 - Roof mounting system

Trailer mounted mast
Extended heights up
to 30 metres
